Joan - Just talked to UDEQ Drinking Water folks earlier this morning. They do not have any drinking water users along the San Juan River (the two systems along the San Juan River, Bluff and Mexican Hat, both have deep groundwater wells, and currently DEQ does not believe there is any influence of surface water on those wells based on previous testing).

I'll be at the 11am coordination meeting as have some more info from CDPHE DW.

Sarah E. Bahrman | Acting Director, Water Program | U.S. Environmental Protection Agency - Region 8

Walt Baker has indicated UT's contact is Dave Ariotti DEQ District Engineer. He's standing in ready to take samples in UT. The stream is classified as a drinking water source from the state line to Lake Powell, but Walt didn't know if there were any intakes in that stretch.

I'll forward contact info when I have it.
